## Artist Profile: Monoboy

There's experimentalism, there's mentalism and there's pissing about. Put them all together in a tangled heap of battered, bruised and bent 8-bit Gameboys, and you've got **Monoboy**. If you've ever wondered 'what happens if...' then you've peeked through a chink in the seedy net curtains of Matt Jones' world, where infectious, seedy, speed-driven electro rubs shoulders with impish 80's video game aesthetics and machines are not mere tools for our use but living breathing victims to be tortured and experimented upon into the small hours of the night...

Monoboy has haunted the live scene around the South for a couple of years, so it's perhaps surprising that his only releases to date have been compilation tracks for notable promoters Tape Club Records and Ejector Seat. Since appearing on Sotones' 'Vol.11' sampler however, praise has flooded in and demand for more tracks continues to tumble into our inbox like so many Tetris bricks. Surely an EP showing is imminent – if only we can stack up enough credits?
